

TRIMTAF

TRIMMABLE BACKING - ZIRCO-CERAMIC DISCS

Nothing is more versatile than TRIMTAF, with its greater overhang of the flaps and a trimmable backing, coupled with TAF premium zirco-ceramic cloth. With many choices in the industry today, look no further.

The special design of this flap disc is specifically manufactured to allow for optimal wearing out of the cloth, permitting the user to always work with fresh grains which extends the life of the disc. In addition, thanks to the engineered configuration of the flaps, a very efficient grinding on intricate surfaces is also achievable.
